

FULLY FEATURED

Router - RS 6000

ENTERPRISE CLASS ROUTING AND SECURITY SOLUTION
FROM ELECTROTEKS

RS 6000 is a powerful and scalable, routing and security solution that addresses the needs of any enterprise irrespective of its size and nature.

With support for WAN interfaces up to 8 E1 connections, industry standard routing protocols (BGP, OSPF, RIP), firewall, VPN, QoS, high availability, WAN load balancing and more, RS 6000 can be used for a variety of routing and security applications.

RS 6000 combines the features, performance and reliability of an enterprise-class router, with flexibility and cost savings.

Applications

- LAN/WAN routing & security for enterprises
- Securely connect remote offices with VPN
- Network redundancy and high availability
- QoS (Quality of Service) traffic management
- Scalable BGP edge routing service providers
